PROFESSIONAL SUMMARY

Product and delivery focused professional with over two years of cross functional experience delivering enterprise fintech software at FinIQ Consulting. Coordinated product releases across clients in more than six countries, managed stakeholder relationships across engineering, operations, and business teams, and used SQL and data analysis to improve delivery consistency. Comfortable moving between discovery, delivery, and iteration. Currently completing an MSc in Management and Technological Change at King's College London, with dissertation research on how organisations respond to generative AI.

PROFESSIONAL EXPERIENCE

FinIQ Consulting India Pvt Ltd June 2023 to July 2025
Application Consultant | Bengaluru, India

- Coordinated product delivery across clients in more than six countries, aligning engineering, operations, and business stakeholders on requirements and release plans through a continuous cycle of multiple releases each month.
- Managed end to end stakeholder relationships for up to two major institutional banking clients at the same time, acting as the primary coordination point throughout the full delivery lifecycle and maintaining clear communication across all workstreams.
- Provided on site delivery and change adoption support for a leading institutional digital bank in North America, recognised by Global Finance, coordinating requirements gathering and user support during a critical implementation.
- Led SQL based regression automation that cut manual testing effort by more than 50 percent, building a repeatable quality process that improved delivery consistency across a high frequency release cycle.
- Designed test plans covering functional and non functional requirements, defined acceptance criteria, tracked outcomes against them, and iterated on quality processes based on findings from each release.

Zoomcar June 2022 to July 2022
Finance and Accounting Intern | Bengaluru, India

- Analysed weekly actuals against budgets, calculated variances, and reconciled rental deposit data across Microsoft Excel and SAP.

Workafy June 2021 to September 2021
Marketing Intern | New Delhi, India

- Built and maintained lead databases targeting founders and CEOs of SMEs across international markets using LinkedIn, Excel, and cold email tools.

Younity.in April 2021 to May 2021
Sales Intern | New Delhi, India

- Ranked as top performer across approximately 400 interns, completing more than 30 sales totalling over Rs. 27,000.

PROJECTS

TicketSphere, King's Business School Design Sprint February 2026

- Contributed across user research, problem framing, product scoping, and Figma prototyping as part of a cross disciplinary team building a digital ticketing platform during a week long sprint.
- Placed 2nd of approximately eight teams, voted by students and industry panellists.

KBS Micro Internship, Jobaggo AI via Practera October 2025 to November 2025

- Supported product analysis and process design for an AI hiring startup as part of a structured micro internship through King's Business School and Practera.
- Scoped workstreams independently, analysed findings, and produced actionable recommendations within fixed deadlines.
